

Biology EC Opportunity: Shot in the Arm.

Each fall thousands of people get flu shots. Use reference books, magazines, newspapers, and the Internet to research the influenza vaccine and how it works. Create a Prezi, PowerPoint presentation, or flyer using Microsoft Publisher that shows the pros and cons of getting annual flu shots, and make recommendations about who should get these shots. **Be sure to write everything in your own words. Otherwise, it is plagiarism and you will not receive credit and will thus just waste your time!**

Submit by November 14 to receive the extra credit.
