

ENVIRONMENTAL SCIENCE EC OPPORTUNITY: ECOFLYER

- Create a flyer using either Microsoft Word or Microsoft Publisher that features a tip on how to be more “environmentally friendly.” Pretend that you are going to post this flyer around the school or another public place so that people are encouraged to develop better habits that can help save our planet. Use the following websites to help you get started or simply do your own research using credible resources from the Internet. You should include your sources at the bottom of the flyer in small print. **DUE November 14, 2013 for extra credit.**
