

Global Climate Change Infographic Instructions

DUE Friday, May 30, 2014.

- ***What is an infographic?*** A graphic representation of information and/or data that aims to present complex information quickly and easily.
- **With a partner**, create an infographic that describes the genetic disease you have been assigned. **BE CREATIVE!**
- You will use the following website to create your infographic:
 - <https://infogr.am/>
 - You can use your Google, Facebook or Twitter account to login. (Don't have any of those accounts? Create a new account at the infogr.am website.)

Global Climate Change Infographic Instructions

DUE Friday, May 30, 2014.

Use the information you have learned in class so far to help you create your infographic in addition to this website:

<http://www.epa.gov/climatechange/kids/solutions/index.html>

Your infographic must include:

1. Statistics on average global temperature
2. Effects of global climate change
3. Examples of recent events that may be due to climate change
4. At least 5 tips an INDIVIDUAL (one person) can do to help decrease global climate change
5. Cite your sources at the bottom of your infographic. (Everything MUST be written in your own words. If you need to quote something, be sure to use quotation marks and then cite your source!)
