

# Responsible Water Use Project

- As we have learned, water can be a limited resource if not used responsibly. Your task is to convince the students and staff in Halsey AOF to use water more responsibly. Create one of the following: video, song, poem, story, or poster that describes how to use water responsibly and why it is important. Be sure to include statistics from a reliable source. ***You may work in pairs or by yourself.*** Be creative! Final product is due **Monday, May 5.**
